Type	Checks	Description
📦	Open source dependency monitoring View monitored lockfiles	We monitor 3rd party dependencies you are using in your app for any known vulnerabilities.
🔍	Exposed secrets monitoring	We are monitoring your application for any secrets which have been accidentally exposed in your source code, currently or at one point in the past.
📜	License management View all licenses	Aikido checks the licenses of all your dependencies to make sure you are legally permitted to make use of them.
{ }	SAST Create custom rule View SAST rules	Static application security testing.
{+}	AI Code Audit Try now View AI Code Audits	Run a one-off AI code audit. Credits are required.
{📄}	IaC View IaC rules	Infrastructure as Code testing. Check which files we can monitor in your application.
⚠️	Supply-chain malware View malware monitor	Aikido checks for dependencies containing malicious or obfuscated code.
📱	Mobile issues View mobile rules	Mobile manifest file monitoring.
